Score above 80% of the population

Payment reliability assessed as greater than 80% of a representative sample of over 18 years old.

The financial reliability score is a **distinct indicator**. It is not an overall rating of the report: although it is based on the same data, it remains independent of the other indicators.

Budget capacity

Assess the level of financial comfort regarding the periodic payment of the expected project amount

How to read your financial capacity?

This indicator measures the impact of the project on your monthly budget. The higher the budget sits on the gauge, the greater the share of your income being mobilised.

Comfort Zone

Low impact on your disposable income.

Caution Zone

The budget is starting to put pressure on your income.

Pressure Zone

A significant share of your income is being consumed.

Other indicators

Income

Total amount of monthly income from all sources identified in the bank transactions (e.g., salaries, rents, etc.). Total from all connected accounts.

High

Days with a negative balance

Number of days per month when the total balance of the connected accounts is negative. Average calculated over the last 3 months.

Bad

Abnormal fees

Average monthly amount of fees that could have been avoided (e.g., automatic debit rejection, overdraft interests).

Good

Warnings

Number of different types of transactions considered risky (e.g., gambling, fees paid to a bailiff, fees related to late loan repayment). Number of distinct types over the observation period of the last 3 months.

No warning

Activity

Indicators evaluating the diversity of transactions on the connected accounts (e.g., presence of salaries, mortgage loans, or if it only contains transfers to another account).

High

Trend

Global trend of account balanced that evaluates the difference between the inbound and outbound transactions. Indicates if the balance has increased, decreased or has remained stable over the last 3 months.

Negative

Rent Payment Regularity

Overview of rent payment regularity over the past 12 months.

Steady
